Not convenient to get to work, tiresome to go there, although people there nice, I like team. But it would be more convenient work in konandai.

4. I would appreciate for any support and help, health support, Japanese language support but not beginning (I'm study with volunteer teachers) and of course it would be nice to have some finance support, until I become independent. I would like to find job where I can grow, learn new things and earn more money, because it will be difficult to live only on my salary without support. I wanna stay in Japan for long time and continue living, here. I like Yokohama and I'm in relationships with my boyfriend, we spent time together and we would like to travel together, go somewhere.. but my salary not enough...

5. I was very happy to land in Japan! Because I want come to Japan very much. I was happy to walk in Japanese street, Tokyo. I could see first time the sea. I never saw sea before. I also was surprised a lot of nature everywhere. I like nature. I like Japanese climate, it's pretty warm. I enjoy Japanese food. New landscapes. I felt that my new life was started and I felt myself in safety when I came to Japan.

<中略>

And people in Japan very nice I feel comfortable with them. My life in Japan became better.
